

## **Sewer Work in 2020**

Construction activities could be scheduled in your neighborhood on multiple days for the remainder of the year, typically between the hours of 7 a.m. to 5 p.m. Notifications should be placed on your door 1-2 days prior of any work directly affecting your property.

We apologize for the temporary inconvenience while the sewer system improvements are in progress and will do our best to complete the work as expeditiously as possible.

We also ask that you follow any “No Parking” signs to allow our trucks to enter and exit construction locations efficiently.
