

Memo from
Town of St. Michaels, Maryland
(410) 745-9535

Marengo Street Water Treatment Plant Update March 20, 2024

The Town's general contractor, Royal Plus, has been diligently working to complete the repairs to the fire-damaged Marengo Street Water Treatment Plant. We are pleased to announce the Town has received approval to operate the Plant on a limited basis in order to provide critical redundancy in our domestic water supply system. All water testing results are well within state and federal allowable standards.

Anticipated installation of the final equipment will be in the next 2-3 months, pending any additional delays in shipping. Completion of all repairs will occur within the next 2-3 months or by mid-summer. Fortunately, the Town's insurance carrier is covering the costs for the repairs to the Water Treatment Plant.

We appreciate your patience and efforts to voluntarily conserve water during this repair process and will keep you abreast of any additional updates.
